

Hotel Salpalinjan Hovi

Hotel building is a former elementary school.

We have six apartment suites which have been beautifully renovated according to different school subjects.

- **Mother tongue**

- The room Native languages and literature has red as its main color. Red is the strongest color just like your native language is the most important language to you.

- **History**

- History can be black and white. The two big windows fill the room with light. Throw yourself on the bed bathing in sunlight and let your mind wander off to the different historical events and perspectives.

Physics, chemistry and mathematics

- Luxurious metallic tones decorate the room that represents the so called hard sciences: physics, chemistry and mathematics. The well-being of society stems from these school subjects and forest and metal industries represent the industry in this area.

Visual arts

- The blue-toned, Art-themed room is furnished with refreshing textiles and you can find art on the walls made with different techniques and styles and children's drawings.

Biology and Geography

The green-toned Biology and Geography -themed apartment includes two rooms which comfortably fit a six-person family. The view from the windows open up to the garden and the school's old sports court, which can be used by the family for playing and games.

In the desk you will find a biology book and on the walls you will find maps and old blackboards. Sustainable development is also part of the curriculum for these subjects.

Music suite

The gold and silver toned plush two roomed apartment is for you if you are in the mood for luxury in your life and want to have the wedding night of your life in the nature. The apartment has a separate entrance from outside and is well suited for long-term stays.

Make yourselves at home!

The room has a kitchen-corner, bathroom, TV and WiFi. The apartment include everything necessary for living.
